TDC Systems Integration is an award-winning multi-million dollar firm that specializes in procuring and installing critical power systems to new and existing infrastructures, including temporary power for construction sites.

Our goal is to provide seamless project delivery of electrical and low-voltage services including communications, network and security solutions.

For more than 13 years, our skilled and experienced staff has successfully completed various electrical projects on time and on budget.

Our expert electrical team works closely with numerous suppliers in the region to ensure that you, our customer, receive highly competitive pricing.

With extensive experience and proven project management skills our team is well prepared to manage projects exceeding \$1 million. Give us a call for an estimate. TDC Systems Integration will successfully manage all of your electrical, security and communication project needs from planning to completion.

Our electrical team has over 40 years of experience and is licensed and certified in several states.
