

telecommunications

Often considered the *lifeline* for many companies, telecommunications provides a vital link to your customers, suppliers, vendors and frankly the world. Not only must your telecommunications system be flexible and reliable, but it must also provide you with the opportunity to grow while containing costs.

Whether designing and installing a new system or integrating components into a legacy system, TDC Systems Integration has the skills and expertise as well as the resources and commitment to excellence to successfully complete your telecom projects.

Our extensive experience in cabling, electrical and systems integration provides a depth of understanding that exceeds that of other suppliers who simply focus on telecommunications. We focus on the entire project.

From system design, to procurement, installation and testing to documentation, TDC Systems Integration has a successful track record of demonstrating our commitment to service excellence and understanding the entire picture, not just portions of a telecom project.

Call or visit us on line today. Our competitive pricing structure makes TDC Systems Integration a preferred provider of telecom, electrical and systems integration services to many Fortune 100 and Fortune 500 companies nationwide.
